Forecast for Friday 27 Nov 2020

Weather: Cloudy throughout the day with some patchy mostly light rain or higher summit sleet or wet snow across the south of the region, this roughly includes the area south of Torridon across to Inverness. To the north of this mostly dry conditions are expected once overnight precipitation has cleared.

Chance of cloud free mountain/hill tops above 800m: Low confidence. Extensive low cloud between 450 and 650 metres expected, although low cloud may only be patchy across ranges north of Torridon close to the west coast, and perhaps the more northern side of Skye.

Visibility: Good in the sheltered north, rather hazy under cloud cover.

Met Office Aberdeen Meteorologist's View
A north-south split across the area today, with clearest conditions in the north but some uncertainty in the exact boundary.

Forecast for Saturday 28 Nov 2020
Weather: Daylight hours will be dry and bright. Freezing fog may blanket a few glens first thing, and again from late afternoon.

Maximum wind: Southerly 20 mph

Chance of cloud free mountain/hill tops above 800m: Low confidence at this stage, but only small amounts of low cloud expected.

Visibility: Mostly good, perhaps some haziness in the air

Temperature: **Glens:** Minus 2 rising to 6 Celsius
At 800m: Plus 3 falling to zero Celsius later in the day
Freezing level: 1100 metres, falling back to 800 metres later in the day
